

Right Eye

Left Eye

AMSLER GRID

Instructions on using the Amsler grid:

- Perform this test for each eye separately at least once a week.
- While wearing your reading glasses, cover one eye at a time.
- Look at the center dot and keep your eye focused on it at all times.
- While looking directly at the center, and only the center, be sure that all the lines are straight and all the small squares are the same size.
- If you should notice any area on the grid that becomes distorted, blurred, or discolored, or otherwise abnormal, please call us immediately.
- If you already have abnormalities on the grid, draw them in with a pen or pencil, and continue to recheck each eye separately at least once a week. Call our office if the abnormal areas worsen or become larger.
- Repeat test for the opposite eye.
